

Submersible Level Transmitter

Why Barksdale?

Engineered for high-performance, the Barksdale submersible transmitter is the ideal choice for level measurement. The operating and compensated temperature ranges are best in class, ensuring a high level of measurement accuracy. The submersible level transmitter is field replaceable, which reduces the overall cost of ownership when longer lengths of cable can be reused.

Applications

- Agricultural Irrigation Systems
- Storage Tanks (Water, Diesel, Chemical, etc.)
- Surface Water Monitoring
- Lift Stations/Wet Wells
- Sewage Treatment Tanks
- Groundwater Monitoring
- Environmental Monitoring/Remediation

Markets

- Water and Wastewater Treatment
- Environmental Monitoring
- Industrial Process Control
- Groundwater Management

Features and Benefits
